## **CALL FOR PROJECT TEAM IN ISRAEL: Hashomer Hatzair Germany History Project 2022**

Hashomer Hatzair\* is the oldest, still existing Jewish youth movement in the world. Until 1938, Hashomer Hatzair was active in several cities in Germany. In 2022, ten years after the official re-establishment of the youth movement in Berlin, we would like to bring the new generation of our movement in a search for traces and memories of the earlier generation of Hashomer Hatzair. You can read more about the project [here](#).

The research group aims to discover the untold stories and forgotten fates of the members of the movement, whose existence was abruptly ended by Nazism. We have relatively little information about our past so far at the same time we already have many ideas for the project's outcomes: from creating educational materials, to commemoration and publishing personal stories as well as articles. Our study creates an opportunity to engage with the Jewish Socialist tradition in Europe and share its past.

**We are looking for 6 VOLUNTARY PROJECT TEAM MEMBERS** (ages 18-99) to support our project research in Israel, where many archival sources with materials from former Hashomer Hatzair Germany members may be found. The team, open for Hashomer Hatzair Israel members, students and researchers, activists and whoever has interest and can imagine supporting us, will work in collaboration with the main intergenerational and international team based in Berlin. It is necessary to have language skills in English, Hebrew and/or German.

The Israeli Project Team will reach out to archives, Kibbutzim and institutions prior to the Study Trip to Israel of the Berlin Project Team that takes place on 18.-27. March 2022. The Israeli Project Team will invited to join parts of the program. Together, as part of the history project, we will get in touch with families and descendants of members, collect information, seek personal items such as photographs, letters and diaries from that time. In Israel, we plan public events to meet members and their families, as well as spread the word about our special intergenerational process.

**You can apply until 07.02.2022** using [this form](#), and will be contacted directly -

### **ABOUT US**

The non-profit organisation Hashomer Hatzair Deutschland (HHD) runs the secular, left Jewish youth movement that was re-established in Berlin in 2012. Since then, it has built a community of members to bring the values and passion of the youth movement back to Berlin. Currently Ken Berlin has 3 children's and youth groups aged 8-15 who meet regularly and participate in annual educational camps, both nationally and internationally. The group sessions are planned and run by a team of young group leaders aged 16-21. ROSBOT, a sub-initiative, works on the development of materials for non-formal education and circulates them through trainings for multipliers (18+).
